

## LS Nav Retail Base Training N – 200

### Objective:

This course is intended to train students to implement and set up some basic functions of the LS Nav retail solution.

Students will do various exercises to:

- Create their own store, terminals, staff IDs, retail items with different options
- Change and add to the POS setup and usage
- Learn about different offer types
- Practice and understand data replication
- Learn other basic setups and options

During the training, students will learn about different setups, on-line and offline, and end-of-day routines including cash management.

At the end of this training participants should be able to setup, implement and operate the basic functionality of LS Nav retail solution.

A multiple-choice certification test is held at the end of the course. Participants need a grade of 75% or higher to pass the test.

### Training Success Prerequisites:

Good basic knowledge of Dynamics NAV. Basic TCP/IP and LS Nav understanding is helpful.

**Intended Audience:** Programmers, consultants, and salespeople

**Number of Days:** 5 consecutive days, daily from 9:00 to 17:00

### Requirements:

All participants must have a PC or laptop with the following setup:

- LS Retail Nav, latest or very recent release, and the demo data company provided with it
- Latest version of LS Retail Data Director
- Current/updated development license with LS Retail objects
- All participants should have a basic proficiency in MS Dynamics NAV
- All participants should be local administrators on the machines they bring
- Access to a wireless network and internet will be available

Due to a tight schedule there will not be time to install the software during the workshop. The download is available from the LS Retail Portal (login required). All partners can register to gain access ([partners.lsretail.com](http://partners.lsretail.com)).

Finally, ensure to update your license prior to the training.

The agenda for the class is as follows:

Day 1	Day 2	Day 3	Day 4	Day 5
<ul style="list-style-type: none"> <li>• LS Retail Overview</li> <li>• LS Nav Setup                             <ul style="list-style-type: none"> <li>○ Store Setup</li> <li>○ POS Setup</li> <li>○ Staff Setup</li> </ul> </li> <li>• LS Nav Item Setup</li> </ul>	<ul style="list-style-type: none"> <li>• Price Management</li> <li>• Variant Setup</li> <li>• Retail Info Codes</li> </ul>	<ul style="list-style-type: none"> <li>• POS Setup</li> <li>• POS Key Commands and Fixed Keys</li> </ul>	<ul style="list-style-type: none"> <li>• Architecture                             <ul style="list-style-type: none"> <li>○ Online</li> <li>○ Standalone</li> </ul> </li> <li>• Data Distribution</li> <li>• LS Retail Data Director</li> <li>• Replication</li> <li>• Transaction Server</li> </ul>	<ul style="list-style-type: none"> <li>• Data Distribution cont.</li> <li>• End of Day Routines</li> <li>• Overview</li> <li>• Certification Test</li> </ul>
