### Update Service for LS Central 1.0.0 released

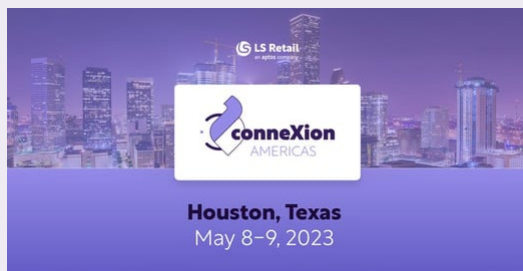

We are excited to announce Update Service (*formerly Go Current*) v1.0.0!

This major update includes a complete rewrite of our server, making it ready for

SaaS deployment. While we've made significant changes under the hood, we've maintained backward compatibility for our clients. To upgrade, users will need to migrate their existing Go Current server to Update Service, which we've made as easy as possible.
